2009/09/24 ASIS Anaheim, CA

ASIS 2009 was the security event of the year! More than 19,000 professionals from around the globe made their way to Anaheim, California, September 21-24. In spite of an economic downturn, business challenges, and dramatic cuts in travel and training budgets, ASIS 2009 only experienced a slight decrease in attendance, less than 9%. Security professionals came ready to do serious business and make the most of their time and money. And they weren't disappointed.

Attendees found first-rate sessions from 160+ sessions in 15 topic tracks. Technology and solutions overflowed from more than 715 exhibitors in 230,000 net square feet of the busy exhibit hall. And the industry's best networking was going at full speed everywhere you looked!

2009/01/12 Release of V3.5

Site-Secure announces the release of V3.5. This latest version includes 30 new reports and several new enhancements. Some of the major features are:

ASIS International's 54th Annual Seminar and Exhibits

More than 21,000 security professionals from industry, government, and law enforcement, along with product manufacturers and service providers from around the world, turned out for the most comprehensive education and networking event in the security industry—and the world's leading exhibition dedicated to security. Attendees from more than 80 countries, including large contingents from Canada, Mexico, Brazil, Japan, Nigeria, South Korea, Taiwan, and the United Kingdom, came to ASIS 2008.

The bustling exhibit floor showcased thousands of cutting-edge technologies, products

and services from more than 850 companies, and covered more than 270,000 square feet in the Georgia World Congress Center.

2007/12/23 Release of V3.4

Site-Secure announces the release of V3.4. This latest version includes 14 new reports and 45 new enhancements. Some of the major features are:

-Statistical view of incidents. This new feature will permit a visual view and summary counts of incidents and related associations. For example how many thefts occurred a given building, who was involved. How many times John Doe was a witness to an incident etc...

PRESS RELEASE

ASIS International's 53rd Annual Seminar and Exhibits the Largest Ever

Nearly 24,000 security professionals from around the world and across the industry turned out for the ASIS International 53rd Annual Seminar and Exhibits, held Sept. 24-27 in Las Vegas. Sponsored by ASIS, the pre-eminent organization for security management professionals worldwide, this event is recognized as the world's largest dedicated to security.

2006/09/29 Release of V3.3

Site-Secure announces the release of V3.3R1. Our latest version includes 48 new reports and 120 new enhancements. Some of the major features are:

Event Driven Actions. This built in module permits the announcement of selected events. For example when a particular type of incident report is entered, you wish to be notified by Email, Text messaging or via the Site-Secure broadcast feature.

The screenshot shows a software window titled "Site-Secure - Event Driven Actions". It has two tabs: "Data entry view" (selected) and "Grid View". The "Data entry view" contains several dropdown menus for selection:

- Program: Incident Reports
- Type of Event: Inserts
- Team: RESERVES
- Region: (empty)
- Branch: NEW PRODUCTS
- Sector: PHARMACEUTICAL
- Site: SITE A
- Level: 4TH FLOOR
- User Name: (empty)
- Code: VANDALISM

Below these is an "Action" dropdown menu set to "Send Email Notification". Underneath are text input fields for:

- Notification recipient: sales@sitesecuresoftware.com
- Subject: Site-Secure | Vandalism
- Message: A Site-Secure incident report on vandalism requires your attention.

At the bottom of the window is a toolbar with buttons for "New", "Search", navigation arrows, "Print Listing", "Save", "Delete", and "Exit".

Daily Activities Log has been added to the **Daily Occurrence Log**. This now permits the logging of special events such as VIP visits or can also be used for post orders.

Driver's license and business card scanning.

Muster reporting for emergency evacuations.

2006/04/27 Visitor Management Software

Site-Secure's new Web based Visitor Management software is the most cost effective on the market today. The stand alone module can reside on your existing PC and network. It records your visitors and keeps track of them for subsequent visits, company staff can pre-register visitors days or weeks ahead with instructions to reception about how to process them upon arrival. Pictures of your visitors are captured and stored via a web camera, drivers licence or passport scanner. Badges can be created with the holders image printed on PVC or peel-and-stick self expiring labels.

All this starting at just \$825.00

The screenshot shows a web browser window titled "Site-Secure -- Visitor Preregistration - Microsoft Internet Explorer". The address bar displays "http://localhost/sitesecure.net2/VisitorPrereg.aspx". The page header includes "Site-Secure", "Visitor Pre-Registration", "sysmgr", and language options "[English]" and "[Français]".

The main form contains the following fields and controls:

- Last Name:
- First Name:
- Middle:
- Company Name:
- Title:
- Telephone:
- Contact Name:
- Contact Phone:
- Alt Contact Name:
- Alt Contact Phone:
- Site:
- Meeting Location:
- From: 2006 August 21
- Till: 2006 August 21
- Estimated Arrival Time: 11 : 00
- Purpose Of Visit:
- Details:

At the bottom of the form are three buttons: "Save", "Additional Guest", and "Exit". The browser's status bar at the bottom shows "Done" and "Local intranet".
